I just took a call from Booth Goodwin, US District Attorney in West Virginia's Southern District.

As you may know, Mr. Goodwin's office has opened an investigation into the Freedom Industries chemical spill that occurred here in Charleston.

Mr. Goodwin called to let me know that on Sunday he reached out to Greg Sayles, Acting Director of the EPA National Homeland Security Research Center in Cincinnati to discuss his investigation but has not heard back. Mr. Goodwin would appreciate R3 assistance in making that connection.
